REPORT NO. 25X1X**REFERENCE COPY**

DO NOT CIRCULATE

1. Location :

Three hundred meters west of the railroad station of Kivioli (27°03'E/
59°22'N), Estonian SSR, north of the railroad line to Taps, and south
of the road to Kivioli.
For location see Annex.

2. Plant installations :

Having been destroyed during the war, the plant was reconstructed and
newly equipped. The stone structure plant building has one smokestack,
65 meters high, and two sheet-metal funnels, extending 3 meters above
the roof. Oil slate dust was used for fueling. A railroad connection
is available. Two turbines, one from General Electric, the other an old
Russian make turbine, were being installed during the time of obser-
vation. It was learned from Soviets that a third turbine which had not
yet arrived was to be installed.

3. Work force :

About 30 to 40 laborers in the power plant.

4. Capacity :

One turbine General Electric 6,000 kws

One turbine of Soviet origin 3,000 kws

(The capacity was seen from inscriptions on the turbines.)

-2-

The scheduled capacity of the third turbine was to be 15,000 kws, according to Soviet statements.

25X1A

Comment :

The reconstruction of the power plant in Fussi is reported for the first time.
